

POPMYRAB POWDER

POPMYRAB POWDER is vegetable extract powder and is hydrolysable tanning material with high in acidity and less salt. It gives mellowing effect and promotes the fixation of condensed type tannins. If blended with catechol tannins it imparts light colour, fullness plumpness and firmness to leather.

TYPICAL ANALYSIS:

Appearance	:	Light Yellowish Powder
Tannins	:	56.35%
Non-Tannins	:	12.7%
Moisture	:	5.0%
pH (1:10 soln.)	:	4-4.5

APPLICATION:

It is particularly suitable for making sole leather when blended with POP GS MIMOSA.

It is used in pit and drum processing in the manufacturing of E.I.Kips, buff calf and hide skins.

It is useful for retanning particularly shrunken grain upper leathers.
