

POPWATTLE POWDER

POPWATTLE POWDER is a natural wattle extract powder, of uniform quality for general usage. It is excellent for, pit tannage, pit-drum or drum tannage and also for the retannage of chrome leather.

TYPICAL ANALYSIS :

Physical Aspect : Brown hygroscopic powder, dedusted.

Ionic Character : Anionic

PCP : Free

Tannins % : 68.0 + 2.0

Moisture % : 6.5 % maximum

pH (1:10 soln) : 4.5-5.0

Properties:

Popwattle Powder is soluble in tap and hot water. It has the following characteristics for vegetable tannage;

- . Efficient penetration.
- . Good fixation.
- . Excellent yield.

For retannage of chrome leather, the use of **POPWATTLE POWDER** permits:

- . Bellies and flanks filling.
- . Better buffing properties.
- . To keep printing effect.
- . Excellent polish effect.

APPLICATION:

POPWATTLE POWDER may be used alone or blended with other vegetable extracts. The following use is recommended:

- . Based on limited weight
30-35 % for vachetta tannage (veg leather)
45-55% for sole tannage.

- . Based on shaved weight
5-15 for chrome leather retannage.

RECOMMENDATION:

During the leather production, there may be a risk of iron contamination. In order to prevent this, we suggest to use an iron-sequestering agent such as Pop Ds Powder (0.2% on the reference weight), which may be added together with the first addition of tanning agents on the tanning or retanning processes.

STORAGE:

POPWATTLE POWDER maintains its characteristics unchanged if properly stored in dry premises protected from sunlight in closed bags.

PACKING:

POPWATTLE POWDER is presented in a powder form, dedusted, and packed in a 25 K.g bag net weight.
